# Our businesses

## Customized winded circuit elements

Focus area

## Customized pot magnets

A high quality and constantly developing production system for %100 customized  
winded circuit elements esp. toroidal inductors and pot magnets

# Our experience & targets

Foundation of NASA Elektronik

1983

New product range of inductors

1995

New production facility

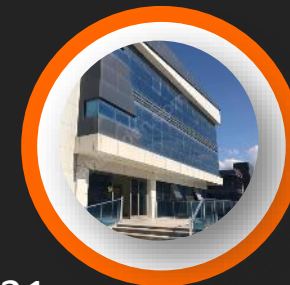

2013

New partnership structure

2019

Move to 2200m<sup>2</sup> factory

2021

2025

New partnership  
& SEMSA Elektronik

1986

Foundation of CORE Electronics  
2. Generation in Management

2012

Onboarding additional key  
competences

2016

2020

Respiratory Ventilators  
project w. COVID19

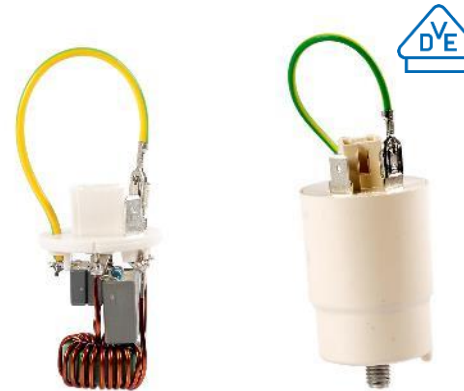

Target: Sustainable growth

# Our product types

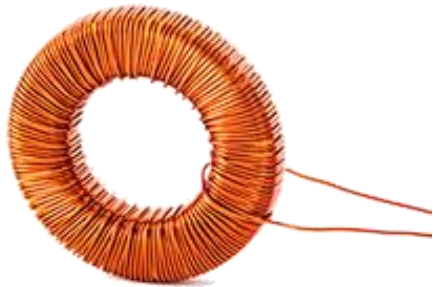

Different types and designs of toroidal inductors for power applications

EMI / EMV filters

- High flexibility in production systems leads to a wide product portfolio defined by the needs of our customers

Dimmer coils

Axial inductors

Current transformers

RFID coils

Magnets

\* VDE approval ongoing

# References

White goods

power supply &  
medical

otomotive

Construction &  
wholesale

# WE ARE LOOKING FORWARD TO YOUR PRODUCT REQUESTS & FEEDBACK
